Have you ever wished that your favorite game never got booted off of the disk? Well, here is the chance to have it protected with what is referred to as "disk image burner". It is the thing that you would want in writing your own unique, complete copy of the game that is completely safe and ready for your enjoyment anytime you are away from the source. It isn't very hard to setup and basically involves the use of a couple of functions to easily cut out just the message or content you are interested in to that you can then burn it to a disk.

With this function, you will no longer have to worry about shutting your system down every time you want to run the game. Rather, you just burn a complete copy of the disk image into a normal disk that you want to use later when needed. It is a smart and handy tool to have if you want to protect your favorite disk image.

This tool has been available for quite some time now and has proven to create complete copies of disk images with no possible form of corruption. Certainly, this kind of function is not usually needed by most people. However, if you really enjoy the luxury of having a backup copy of some disk image that has been customized with your own personal content, this is going to make that easier than you thought it was going to be.

The task of using this tool is easily accomplished. It hasn't
